

Preparation checklist

AI Audit Snapshot · for a CEO or owner · 102 questions, about 85 minutes with the answers at hand

How to use this. These are the questions you will be asked, in the order you will see them. Tick each one you can answer today; for the rest, note who in the company has the answer. You do not need to finish in one sitting: leave the questionnaire at any point and the resume link in your email brings you back with everything saved. "Don't know" is always an allowed answer and is treated as a finding about visibility, not as a mark against you.

Context and identity

Have at hand: Your industry code, headcount, revenue band, where you operate, which laws and standards you work under, and who owns AI decisions today.

- ☐ How long have you been in this role?
- ☐ Which AI-relevant laws, regulations, or frameworks does your company operate under? Check every one that applies (or would apply if a regulator asked).
- ☐ How long has your company been using any AI tools?
- ☐ Was your AI adoption strategy formally approved by leadership before tools were deployed?
- ☐ Why are you completing this assessment? (select all that apply)
- ☐ Voluntary AI, data, and security standards your company aligns with or claims compliance to. Includes standards required by customer contracts or insurance policies.
- ☐ Governance and fiduciary frameworks that bear on your board's or executive team's AI oversight obligations.
- ☐ Contractual and supply chain expectations that require AI-related evidence from your company.
- ☐ Across the regulatory, voluntary, governance, and contractual items you selected in the previous four questions, what is the dominant cadence at which your company must produce evidence?

AI tool inventory and discovery

Have at hand: A list of every AI tool in use, sanctioned or not: name, who uses it, what data it touches, who pays for it. Ask around; the unsanctioned ones matter most.

- ☐ Which AI tools does your company currently use? Check every tool anyone at the company uses.
- ☐ Does a single document exist that lists every AI tool currently in active use across the company?
- ☐ What does that inventory include? (select all that apply)

- ☐ When was the inventory last updated?
- ☐ Who maintains the inventory?
- ☐ Has anyone attempted to create an AI tool inventory?
- ☐ Why hasn't an inventory been built? (select all that apply)
- ☐ If a regulator or acquirer asked for a complete AI tool inventory today, how long would it take to produce?
- ☐ Have you been asked for an AI tool inventory in the past 3 months by anyone external (auditor, insurer, customer, board)?
- ☐ How many AI tools does leadership believe are in use across the company?
- ☐ How confident is that number?
- ☐ Have any AI tools been adopted at the team or department level without central IT or leadership approval?
- ☐ To what extent has the company identified vendor-enabled AI features in its existing software stack (in the past 3 months)?
- ☐ For the top 3 AI tools by spend or strategic importance in your company, indicate which of the following apply:
 - ☐ Tool 1
 - ☐ Tool 2
 - ☐ Tool 3
- ☐ Which categories of vendor-enabled AI features are confirmed active in your environment? (select all that apply)
- ☐ How many AI tools have been added in the past 3 months?
- ☐ How many AI tools have been retired in the past 3 months?
- ☐ Were any tools retired because they failed to deliver value, or because of risk/compliance concerns?
- ☐ Is there a defined approval process required before a new AI tool is adopted?

Cost mapping

Have at hand: Last 12 months of AI spend: subscriptions, API bills, vendor contracts, staff time. Your finance system or card statements are the source.

- ☐ Total monthly AI spend, all sources combined
- ☐ How confident is that number?
- ☐ Have any AI charges appeared on company cards in the past 3 months that no one initially could identify?
- ☐ Is AI spend tracked as a distinct budget line in financial reporting?
- ☐ What does that spend report include? (select all that apply)
- ☐ Which of the following hidden AI costs has the company quantified or documented (in the past 3 months)? (select all that apply)

- ☐ What multiple of subscription cost do you estimate hidden costs (time, errors, training, integration) add?
- ☐ Has anyone calculated the ROI of any AI tool in the past 3 months?
- ☐ If asked by the board today, could you defend every dollar of AI spend?

Performance measurement

Have at hand: Any targets set for AI tools, any measurement of results, any tool retired for missing its target.

- ☐ For the company's top 3 AI use cases by spend or strategic importance, indicate which apply (past 3 months):
 - ☐ Use case 1
 - ☐ Use case 2
 - ☐ Use case 3
- ☐ Who reviews AI performance metrics?
- ☐ Has any AI tool been continued despite consistently missing its target metric?
- ☐ Has any AI tool been killed because it missed its target metric?
- ☐ How often are AI errors caught before reaching customers or final decisions?
- ☐ Is there a defined review process for high-stakes AI outputs (customer communications, financial decisions, hiring)?
- ☐ Has any AI error reached a customer or external party in the past 3 months?
- ☐ Has any AI error been disclosed to a regulator or auditor?
- ☐ Have any AI tools been benchmarked against alternatives?
- ☐ Has AI performance been compared against pre-AI process baselines?
- ☐ Are AI tool vendors required to provide performance data?
- ☐ Have you measured customer or employee satisfaction with AI-touched processes?
- ☐ For AI systems involved in hiring, promotion, lending, credit, or other regulated decisions, has a documented bias audit or fair lending review been conducted in the past 12 months?

Risk exposure

Have at hand: Vendor contracts and data-handling terms, where customer or regulated data goes, any incident or near miss, cyber insurance terms, counsel's involvement.

- ☐ Has sensitive company information been entered into any external AI tool?
- ☐ What categories of sensitive information? (select all that apply)
- ☐ Have data subjects (customers, employees) been notified about AI processing where required by law?
- ☐ Has AI been involved in any of the following high-stakes decisions or outputs in the past 3 months? (select all that apply)

- ☐ Is any AI tool generating customer-facing communications without human review?
- ☐ Are AI tools generating content that could be misattributed to a human?
- ☐ Has any AI-produced content been published or sent externally without disclosure?
- ☐ Are any AI tools embedded in customer-facing communications?
- ☐ Could you switch from your most-used AI vendor within 90 days if required?
- ☐ Have you reviewed indemnification language in AI vendor contracts?
- ☐ Does any insurance policy specifically address AI-related liability?
- ☐ Has counsel provided an opinion on AI-related liability exposure?
- ☐ If AI is involved in hiring, promotion, or termination decisions, has a bias audit been conducted in the past 12 months?
- ☐ For hiring in New York City, has the company complied with the annual bias audit requirement under NYC Local Law 144?
- ☐ For public-facing claims about your company's AI capabilities (marketing copy, investor communications, sales pitches, SEC filings), is there a documented process for substantiating those claims before publication?
- ☐ Does your company publish a customer-facing list of AI sub-processors (publicly available or available to customers on request) — the customer-facing AI Third-Party Governance Statement?
- ☐ For AI use cases affecting fundamental rights (employment, credit, healthcare, education, housing, public benefits), has human override capability been designed into each use case?

Governance gaps

Have at hand: Board or executive minutes mentioning AI, any AI policy, the committee or person accountable, training records, how exceptions are handled.

- ☐ Is there a published AI usage policy?
- ☐ For each of the following governance structures, indicate the current state (past 3 months):
 - ☐ Named executive accountable for AI outcomes
 - ☐ AI as a standing topic at executive meetings
 - ☐ Board has received AI reporting
 - ☐ AI steering committee or governance body
 - ☐ Board minutes from last 12 months document AI risk discussion
 - ☐ Audit committee has reviewed AI-specific risks in the last 12 months
 - ☐ Board AI competency disclosed in proxy or board-skills matrix
- ☐ Has the company taken any action based on a formal AI review?
- ☐ Is there a documented process for evaluating new AI tools before adoption?
- ☐ Have any AI-related audits been conducted (internal or external) in the past 12 months?
- ☐ Are AI risks on the corporate risk register?
- ☐ Is there a training program for employees on appropriate AI use?

- ☐ What are the top three barriers to better AI outcomes in the company? (rank top 3)
- ☐ Has the company assessed its AI use cases against ISO/IEC 42001 (the AI management system standard)?
- ☐ Has the company assessed its AI use cases against the NIST AI Risk Management Framework?
- ☐ For AI systems with EU customers, employees, or partners, have they been classified against the EU AI Act risk tiers?
- ☐ For AI systems with EU AI Act exposure, has provider vs. deployer position been identified for each system?
- ☐ If a regulator opened an inquiry today on an AI system, could the responsible executive produce a documented record of the system's risk classification, controls, and oversight history within 5 business days?
- ☐ If an acquirer or insurance carrier asked how AI risk is governed, is there a single document or dossier ready to share?
- ☐ Have AI use cases been classified by impact tier (Critical / High / Moderate / Low)?
- ☐ Are per-use-case governance records (dossier, profile, or equivalent) maintained for the highest-impact AI systems?
- ☐ Is AI governance conducted on a recurring documented cadence (monthly, quarterly, annual)?
- ☐ For your highest-impact AI use cases (per T1-F-019 classification), does each have a system-level documentation package including: purpose, training data sources, model version, evaluation results, known limitations, and human-oversight controls?
- ☐ If a customer, regulator, or acquirer asked which of your AI systems are subject to sector-specific regulation (HIPAA, GLBA, FERPA, DFARS, EU AI Act high-risk, NYC LL144, etc.), could you provide a current mapping within 5 business days?
- ☐ Has your company adopted an AI-specific operational risk taxonomy (e.g., the V1 Ch 7 AI Operational Risk Categories or equivalent), with each category mapped to entries in the corporate risk register?
- ☐ Does your company maintain a documented AI internal audit log capturing scope, findings, and evidence for each review (the AI Internal Audit Workpaper Log)?
- ☐ Does your company maintain documented minutes of management reviews specifically covering AI risk, performance, and incidents (the AI Management Review Minutes Log)?
- ☐ Does your company maintain a documented register of corrective actions taken in response to AI incidents, audit findings, or management review items (the AI Corrective Action Register)?
- ☐ During an AI-related incident, does your company have a documented communication protocol covering internal stakeholders (legal, board, executives), external regulators, and affected customers (the AI Communication Alignment Protocol)?
- ☐ For each AI use case in your company, has the decision influence (e.g., advisory, recommendation-with-human-confirmation, autonomous) been documented and approved (Decision Influence Matrix tier assessment per V1 Ch 5)?

Outcomes, workflow and confidence

Have at hand: Which business outcomes AI was meant to move, where it changed a workflow, and how confident you are in each answer.

- ☐ What outcomes does leadership want AI to produce, in order of priority? (rank top 5)
- ☐ Are AI investments tied to specific business outcomes in budgeting?
- ☐ If the company expanded AI use 3x, would current governance support it?
- ☐ Confidence that the company is getting value from its AI spend
- ☐ Confidence that the company would survive regulatory scrutiny of its AI use today
- ☐ Confidence that AI risks are understood at the leadership level
- ☐ Confidence that the company's AI program is aligned with stated business outcomes

Follow-up

Have at hand: Anything the questionnaire did not ask that you think the auditor should know. Write it down; it is read.

- ☐ Which of the following would you like to receive based on these findings? (select all that apply)
- ☐ What's your preferred follow-up method?
- ☐ Anything we should know that the questionnaire didn't ask? (optional, max 1000 characters)
